

COMMITMENT

To our valued customers, suppliers and friends

We are pleased to inform you that **Sere-med** has embraced the significant challenges confronting our environment and wildlife.

To achieve this, we are focused on these two activities:

SINGLE USE PLASTICS

In concert with global efforts to reduce plastics in our environment particularly in the worlds oceans, **Sere-med** will endeavour to utilize suitable alternatives to plastics in our business operations, products and services.

Sere-med is also encouraging our local and international suppliers to partner with us in our initiative that will in a small way preserve the planets wonders for future generations.

PARTNERSHIP IN WILDLIFE

Sere-med is committed to the sustainability of a healthy environment in which all animal species, especially those that are endangered can co-exist, be protected and thrive.

The Endangered Wildlife Trust (EWT)

Sere-med is privileged to announce that through our partnership with the Endangered Wildlife Trust and the continuous support of our valued customers, proceeds from the sale and use of our Epiglu, CryoPen cartridges and our Public Access Defibrillators (AEDs) will be channelled into numerous EWT programmes, most recently the **Cheetah Metapopulation Project**.

We are confident that by working together..... our efforts will ensure that the heartbeat of Africa continues.
