

# Sere-med STETHOSCOPE

**NPX  
Pikkie**

Diagnose **LITTLE** Heart Beats Perfectly  
with LUXAMED's® **YOUNGEST** Addition

## STETHOSCOPE NPX PAEDIATRIC - The Pikkie (3 in one)

The double stainless steel chest piece of the NPX is produced from a high quality, CNC milled manufacturing process that ensures excellent auscultation of high and low frequencies ranging from 20 – 2000 HZ.

STETHOSCOPE NPX offers excellent sound characteristics due to the perfectly tuned mass proportion of the reversible chest piece to the diaphragm.

### THE BELL

The standard bell configuration with diaphragm, is ideal for use on smaller parts of the body. **To enhance the function of the bell**, simply remove the small neonatal diaphragm to listen to lower frequency sounds. **Large diaphragm** for **paediatrics** and **small diaphragm** for **neonatal**. Bell function - remove neonatal diaphragm.

### THE RETAINING RINGS AND DIAPHRAGMS

These are made of light metal with a SOFT FEEL coating for more comfort on the skin.

The retaining rings and diaphragms are easy to disinfect, guarantee limited wear and tear and the chance of breaking is reduced. The retaining rings facilitate easy exchanging of both vibration diaphragms.

The chest piece (diaphragm and bell sections) have very fine threads which reduces dirt collection and ensure minimal cleaning. The design facilitates easy removal, replacement and or re-attachment of the retaining rings and diaphragms especially following the use of the bell in the low frequency application.

### SOFT SILICONE REMOVABLE EAR TIPS

Adapt optimally to the auditory canal affording a comfortable fit in the ear.

These unique SOFTBUD Ear Tips in a sound insulating design, guarantee optimum sound transmission and perfect auscultation without any background noise. The inside plastic body of the Ear Tips prevent the inadvertent closing of the Ear Tips during head movements and ensures a noiseless movement of the binaural.

SOFTBUD Ear Tips – small, medium, and large supplied with the NPX are easy to clean, remove, re-attach and replace.

### SPECIFICATIONS

Latex and nickel free binaural, chest piece and Ear Tips.

Weight	(Chest piece): 95gm
Diameter	(Large Diaphragm): 3.2cm
Diameter	(Small Diaphragm): 2.2cm
Length	(Binaural incl Ear tips): 72cm
Length	(Total incl Chest piece): 77cm
